Institute of Organic Chemistry, PAS in Warsaw Offers fellowships

in the **TEAM** project founded by the **Foundation for Polish Science**

- **2 Postdoctoral fellow** - ~ 1250 euro per month+ medical care
- **3 Ph.D. students** -670 euro per month + medical care
- **2 students** - 220 euro per month

Novel approach towards NO-free activators of sGC enzyme for medical treatment of heart diseases

Project coordinator: Dr hab. Dorota Gryko

Fields: organic chemistry, biochemistry, medicinal chemistry

Aim: The goal of this project is to produce new functional mimics for sGC regulation. We believe that chemically modified corrin compounds or other tetrapyrroles may be effective regulators.

Colaboration:

Ph.D. Emil Martin

Ph.D. Marie-Francoise Doursout

University of Texas, Health Science Center
Houston, USA

THE UNIVERSITY of TEXAS
HEALTH SCIENCE CENTER AT HOUSTON

M.D. Ph.D. Ferid Murad

University of Texas, Medical School
Houston, USA

Duration of the project: since September 2009 till August 2013

Requirements

- Ph.D.: essential Ph.D. degree granted after September 2005
- Ph.D. students: essential university degree in organic chemistry or biochemistry
- students: after 3 years of their studies

Candidates should submit their applications (**CV**, **grade point average** for students, **transcript of records** for graduate students and **final Ph.D. studies mark** for the postdoc position, **recommendation letter** (1 for Ph.D students and 2 for postdoc), and covering letter.

Applications should be submitted before September 15, 2009.
