Case for Support

Parts B, C, D, E and Appendices

Note. *Parts B, C, D and E* should be completed in free style but you must address the numbered issues in each part (in number order). Furthermore you should do so in the context of the purpose of the scheme i.e. **to enable outstanding young researchers from anywhere in the world, with potential to become world class leaders in their research area to start new original and groundbreaking lines of research in a European environment for the benefit of the development of European science. In so doing, they will contribute to the building up of the next generation of leading European researchers.** Therefore, in addressing the issue you should attempt to demonstrate that **you** meet these criteria in terms of your track record, the research you are now proposing and the suitability of the host institution to contribute to these goals.

Part B: Background of the Applicant

Scientific track record (maximum 4 pages A4) to include:

- B.1 Summary of results and conclusions of your recent work in the scientific area covered by the research proposal
- B.2 Information on current or past sources of research funding. Postdoctoral positions: name of the institution, address, name of the head, phone, email, date of the beginning, date of the end
- B.3 Experience in working as an independent researcher, team leadership and project management
- B.4 Your ten most relevant publications
- B.5 Why the EURYI Award would be timely for you at this point in your career path
- B.6 Research collaborations (both national and international)
- B.7 Information on prizes or special awards given in recognition of your scientific achievement
- B.8 Other

Part C: Project Description

Provide a detailed project description (max 10 pages A4 not including Work Plan; see C. 8) that addresses:

- C.1 Overall aims and objectives of the research
- C.2 Proposed methodology to be used
- C.3 Novelty and groundbreaking character of the proposed research
- C.4 Management of the project
- C.5 Positioning of the project in the international context of research in this field
- C.6 Expected results in relation to the current international status of research in this field
- C.7 Impact and potential for promoting scientific innovation, both inside and outside the field
- C.8 Work Plan (maximum 1 page A4) Milestones and targets for the proposal

Part D: Financial Plan and Justification of Resources Awarded

Include a detailed budget for the 5-year period according to the standard procedures of the participating organisation.

Part E: Host Institution (maximum 1 page A4)

Include a statement on the host institution, covering your knowledge of its reputation and facilities, any existing or previous collaboration with it and the reason you have chosen it.

Appendix 1: CV of Applicant (maximum 10 pages A4)

Appendix 2: Letter from the Host Institution

This letter, signed by a person authorised by the administrative authority of the host research institution, should describe the nature and level of support that will be available to the applicant for the duration of the award. The following should be included but the list is not exhaustive:

- A description of the research infrastructure that will be made available (equipment, computing (normal and where relevant, high speed computing), fixed research infrastructure such as clean rooms etc. and the *level* of access to be given to them;
- Arrangements in place with other research institutions for access to their facilities which will be extended to the award holder;
- Technical support services for example materials or biological sample testing, calibration / technical support for instrumentation etc;
- Scientific support and encouragement from academic staff and other researchers in related areas of research or areas where synergy could be developed through collaboration e.g. nanotechnology and IT.

Appendix 3: Letters of Recommendation (in English) in Support of Your Application

Please submit a maximum of two letters of recommendation (in English) in support of your application. These letters should be from scientists of your choice who have a recognised well-established international reputation in the area of your research, and are familiar with your work. They should attempt to give an impartial assessment of your qualities as they relate to the selection criteria.
