

JOB OFFER

Position in the project:	Sano Postdoc - Project title: Scientific Researcher - Integrative Omics for Modelling and Simulation
Scientific discipline:	Computational Medicine, Data Science, Computer Science
Job type (employment contract/stipend):	A full-time contract of employment for 2 years
Number of job offers:	1
Remuneration/stipend amount (<i>"X0 000 PLN of full remuneration cost, i.e. expected net salary at X 000 PLN"</i>):	<ul style="list-style-type: none"> • An attractive basic salary up to 14000 PLN gross • Additional private medical care and partially sponsored access to sport facilities
Position starts on:	Expected start in April 2022 (but depends on Candidate's availability)
Maximum period of contract/stipend agreement:	2 years
Institution:	Sano Centre for Computational Personalised Medicine – International Research Foundation, Krakow, Poland
Project leader:	Dr. Zbigniew Struzik (Modelling and Simulation Research Group Leader)
Project title:	<p>Operationally, Sano strategically combines the most prestigious scientific grant currently available from the national Polish Foundation for Science (FNP) – the International Research Agenda Programme (IRAP) – with one of the most competitive grants in the EU's H2020 programme, Teaming for Excellence.</p> <p>Combined with additional Polish Ministry of Science guarantees, the Centre has secured investment exceeding €30M. With this scale of funding, and aided by an excellent European partnership network, we can be confident that Sano will bring a critical mass to this transformational field of research, in order to translate scientific advancement into clinical practice.</p>
Project description:	<p>Sano presents a great opportunity for people who want to make a change in the world by developing life-changing technologies and solutions for healthcare worldwide.</p> <p>Sano Centre for Computational Medicine is a new International Scientific Foundation located in Kraków, Poland.</p> <p>Sano aspires to be a major translational scientific institute, operating at the meeting point of academic science, established MedTech industry, and emerging start-up environment, combining the best of these three perspectives.</p> <p>Established with support from the European Commission and the Foundation for Polish Science, Sano aims to be a major driving force behind the advancement of computational medicine for the benefit of healthcare systems worldwide.</p> <p>Sano acts as a core technology and expertise provider for industry, and creator of innovation, developing state-of-the-art solutions for healthcare. Thanks to the substantial funding and excellent European partnership network, Sano will bring a critical mass to this transformational field of research, in order to translate scientific advancements onto clinical practice. Sano's ambition is to become the Reference Centre for Computational Medicine in Central Europe and build a reputation as a leading institute on a global level.</p> <p>As a cross-disciplinary institution, Sano uses machine learning/artificial intelligence (ML/AI), large scale computer simulations (HPC), data science, and other computational technologies towards overcoming global challenges in healthcare systems. The research agenda will be executed in close collaboration with Partners in Poland, EU and USA.</p> <p>We value:</p> <ul style="list-style-type: none"> • Passion - Passion in what we do, engagement in Sano operations, taking responsibility, providing initiative, being happy at work.

- Innovation - Boldness in articulating and pursuing novel ideas, courage to think outside the box.
- Integrity - Directness, openness, tolerance and respect. Scientific integrity (we do not cut corners).
- Diversity - Diversity in backgrounds, cultures and opinions of Sano employees. Promotion of women in STEM.

Sano's Research Agenda is built on six research pillars, interacting with each other. For each of the pillars, Sano aims to attract senior professionals to assume positions of Group Leaders. Although fully independent, all of the groups at Sano will be working in concert to invent computational healthcare solutions of the future.

Sano is looking to fulfill a role of:

Project title: Scientific Researcher - Integrative Omics for Modelling and Simulation

You will contribute to developing scientific vision of excellence and help with turning scientific vision into tangible solutions for clinicians and patients.

Output of your high-quality research will be published in leading journals and will propel development of new healthcare solutions, methods and paradigms. You will either engage in fundamental theoretical research with a clear applied facet — or you may prefer to draw from theory in developing methods.

You will join the Team dedicated to the discovery of mechanisms, methods and paradigms for the development of computational methods pertaining to making biophysical complexity tractable.

As a member of the Team of excellence at a rapidly developing Institute, you will have important impact on how the Team and indeed, how the Institute will evolve, and how they will go about meeting their strategic objectives in the long run.

If you i) enjoy creating science; ii) enjoy helping organisations and people grow; and iii) enjoy contributing to scientific workplace culture (while accepting that some elements are in flux, and adaptation to an evolving environment is important), then you are the kind of person we would like to talk to. We expect a full-time, dedicated commitment to ensure continuity within the team.

Key responsibilities include:

Scientific discipline: Integrative Omics, MultiOmics and one of: Physics, Mathematics, Chemistry, Computer Science, Computational Medicine, Data Science, Machine Learning, Complexity

We are looking for passionate, motivated scientists preferably with a few years of postdoctoral experience in MultiOmics, i.e. the field of Integrative Omics. We invite you to join us as Research Scientists/Postdoctoral Fellows and to become key contributors to our Team. Brilliant PhD graduates (recent and pending) are also invited to apply.

We are a rapidly expanding Team within a new not-for-profit research Institute, dedicated to the advancement of computational physiology and medicine. We aim at developing fundamental and applied approaches and solutions for the prevention, diagnosis, and treatment of diseases.

If you i) are a person who is interested in cutting-edge research in computational medicine; ii) are passionate about the use of computing paradigms in medicine; iii) want to actively and profoundly influence the future of healthcare through engagement in exciting and impactful projects; please contact us and talk to us in order to find out more about this opportunity.

What are you going to do?

You are expected to:

	<p>→ conduct original, frontier scientific research, independently and under the supervision of the Team Leader;</p> <p>→ publish your work in peer-review scientific journals and present the results of your work during national and international workshops and conferences;</p> <p>→ contribute to building the scientific image of excellence of the Team;</p> <p>→ co-mentor junior scientists – PhD students and MSc students;</p> <p>→ actively contribute to fund raising efforts of the Team.</p>
Profile of candidates/requirements:	<p>As our successful candidate you should have:</p> <p>→ PhD degree (or equivalent) pertaining to Integrative Omics in science or engineering (physics/mathematics/chemistry/computer science/biomedical engineering or related fields);</p> <p>→ at least three first-author research publications in peer-reviewed scientific journals;</p> <p>→ excellent knowledge of computational methods;</p> <p>→ ability to think creatively and critically, work independently, and solve complex problems;</p> <p>→ interest in pursuing theoretical and/or applied computational research in the fields of computational physiology and medicine in a multi-disciplinary environment;</p> <p>→ excellent written and oral English communication skills as the main language in Sano is English.</p>
Required documents:	<p>Sano is an equal opportunities employer. We prioritize diversity and are committed to creating an inclusive environment for everyone. We value a spirit of enquiry and perseverance, provide the space to keep asking questions, and promote a culture of curiosity and creativity.</p> <p>Do you recognize yourself in the job profile? Then we look forward to receiving your application.</p> <p>Applications in .pdf should include:</p> <ul style="list-style-type: none"> • a cover letter; • a curriculum vitae.
We offer:	<p>We offer a fixed term contract for 40 hours per week for the duration of 2 years. This will be supported by an educational plan that includes attendance of courses and (international) meetings. The contract will include opportunities to participate in teaching and supervision of undergraduate and master students.</p> <p>The salary, depending on relevant experience before the beginning of the employment contract, will be up to 14000 PLN gross per month, based on a full-time contract (40 hours a week) for the duration of 2 years with private medical care and a sports card.</p> <p>Postdoc will be based in Poland, Krakow operating in conjunction with the Cyfronet supercomputing centre hosted by AGH.</p> <p>Sano offers excellent opportunities for study and development, an access to many international conferences on computational medicine and a possibility to grow in a scientific society.</p>
Please submit the following documents to:	<p>Our recruitment system:</p> <p>https://sano.elevato.net/en/sano-postdoc-scientific-researcher-integrative-omics-for-modelling-and-simulation.ja.110</p> <p>We will support you in every stage of the recruitment process.</p>
Application deadline:	Maj 31 st 2022

Non-Discrimination

To provide open, transparent and internationally accessible career development opportunities the Centre will follow The European Charter for Researchers and The Code of Conduct for the Recruitment of Researchers. The entire recruitment process will be carried out respecting the non-discrimination rules; the Centre is an equal opportunity employer, values diversity and affirms the right of every qualified applicant to receive consideration for employment without regard to race, colour, religion or belief, sex, gender identity or expression, national origin, language, sexual orientation, disability, age, political opinion, social or economic condition.

Your Personal Data

In accordance with the general regulation of 27 April 2016 on the protection of personal data, hereinafter referred to as GDPR, we wish to inform you that:

1. The Administrator of your personal data is the Sano Centre for Computational Personalised Medicine - International Research Foundation – located at (30-072) Kraków, ul. Nawojki 11. The Administrator may be contacted at the following e-mail address: legal@sano.science.
2. Your personal data shall be processed for the purposes of the recruitment process.
3. The legal basis for processing your personal data for the purposes of recruitment shall be Article 6 Section 1 Point c of the GDPR, with processing being necessary for the fulfilment of a legal obligation to which the Administrator is subject, particularly Article 118a of the Law on Higher Education as well as Article 221 of the Labour Code. The condition legalising the processing of personal data provided voluntarily by the candidate, which is beyond the scope of data referred to in Article 221 of the Labour Code, shall be Article 6 Section 1 Point a of the GDPR – consent by the data subject.
4. Providing your personal data, subsequent to the decision to enter the recruitment process, is obligatory within the scope defined by Article 221 of the Labour Code and the Law on Higher Education and determines the possibility of applying for work as well as possible further employment. In the case of personal data which is beyond the scope of the aforementioned legal regulations, providing your data is voluntary but it does determine the possibility of participating in the recruitment process.
5. Your personal data shall be processed on behalf of the data administrator by authorised personnel purely for the recruitment purposes.
6. Your personal data shall be stored for a period of time necessary for the fulfilment of the recruitment process. Should the recruitment outcome prove negative, your data shall be removed immediately at the completion of recruitment, unless otherwise provided by the record-keeping regulations – then for a period of time specified in these regulations.
7. Your personal data shall not be shared with external entities with the exception of cases provided for by legal regulations. Should you submit your application documents in electronic form, the recipient of your data may be an entity acting on behalf of the administrator i.e. a mail service operator.
8. Under the terms of the GDPR, you shall be entitled to:
 - a. the right to access your data,
 - b. the right to rectify it if factually incorrect,
 - c. the right to remove or restrict the processing of the data as well as the right to data portability – in cases prescribed by the law,
 - d. the right to object to the processing of the data,
 - e. the right to file a complaint with the supervisory authority – the President of the Personal Data Protection Office, should you consider that the processing of your personal data violates personal data protection regulations.
