

Daniel Stec

Lista Publikacji

1. Stec, D., Morek, W., Gąsiorek, P., Michalczyk, Ł. (2018). Unmasking hidden species diversity within the *Ramazzottius oberhaeuseri* complex, with an integrative redescription of the nominal species for the family Ramazzottiidae (Tardigrada: Eutardigrada: Parachela). *Systematics and Biodiversity*, 16(4), 357-376.
2. Stec, D., Krzywański, Ł., Arakawa, K., Michalczyk, Ł. (2020). A new redescription of *Richtersius coronifer*, supported by transcriptome, provides resources for describing concealed species diversity within the monotypic genus *Richtersius* (Eutardigrada). *Zoological letters*, 6(1), 1-25.
3. Stec, D., Krzywański, Ł., Zawierucha, K., Michalczyk, Ł. (2020). Untangling systematics of the *Paramacrobotus areolatus* species complex by an integrative redescription of the nominal species for the group, with multilocus phylogeny and species delineation in the genus *Paramacrobotus*. *Zoological Journal of the Linnean Society*, 188(3), 694-716.
4. Stec, D., Vecchi, M., Maciejowski, W., Michalczyk, Ł. (2020). Resolving the systematics of Richtersiidae by multilocus phylogeny and an integrative redescription of the nominal species for the genus *Crenubiotus* (Tardigrada). *Scientific reports*, 10(1), 1-20.
5. Stec, D., Vecchi, M., Calhim, S., Michalczyk, Ł. (2021). New multilocus phylogeny reorganises the family Macrobotidae (Eutardigrada) and unveils complex morphological evolution of the *Macrobotus hufelandi* group. *Molecular Phylogenetics and Evolution*, 160, 106987.
