SUPPLEMENT TO THE COMPETITION DOCUMENTATION FOR THE INTERNATIONAL RESEARCH AGENDAS PROGRAMME REGARDING THE COMPETITION FOR FUNDING THE PURCHASE OF SPECIALIST EQUIPMENT

Supplement to the competition documentation, 2017 September, 22.
I. Introduction

The information contained in the present document sets out the rules for submitting and evaluating applications for funding the purchase of specialist equipment in the **IRAP projects carried out as part of the International Research Agendas (IRAP) programme**, funded from the European Regional Development Fund under the Smart Growth Operational Programme (SG OP), being a grant project of Axis 4 of the SG OP programme: Increasing the research potential, Measure 4.3.

The present document supplements the Competition Documentation concerning the International Research Agendas programme by specifying the competition procedures relating to the purchase of specialist equipment (hereinafter referred to as the “competition”). In the case of participation in the competition and inconsistency between any provisions of the present document and the IRA Competition Documentation as part of which the programme is carried out, priority is to be given to this supplement.

The competition is aimed at enabling the IRAP Project Manager the purchase of specialist equipment to meet the needs of research groups in the IRAP units after the competition procedure has been conducted and the research group leader has been selected (this also applies to applicants in the IRAP competition who take up the position of a research group leader). The present documentation only concerns equipment necessary to carry out R&D projects falling within the scope of the research agenda funded by the Foundation for Polish Science (FNP).

II. General information

The competition based on the rules specified in the present document is not a competitive mode within the meaning of the Act of 11 July 2014 on the Principles of Implementation of the Cohesion Policy Programmes Financed under the 2014-2020 Financial Perspective.

2.1. Subject of the competition

2.1.1. The purpose of the competition is to enable the winners of the International Research Agendas programme to purchase, in the course of the aforementioned project, of the specialist equipment understood as a set of testing, measurement or laboratory devices with a low degree of universality and high technical parameters (usually measurement precision higher by several orders of magnitude as compared with typical equipment used for production or operational purposes) – hereinafter referred to as the “equipment”. The equipment does not include computer hardware and other devices which are not used directly to carry out R&D work.¹

¹ Pursuant to the definition of research equipment of the Central Statistical Office of Poland (GUS) (source: Definitions of terms concerning science and technology statistics, GUS, Warsaw)
2.1.2. Funding may be obtained in accordance with the competition at the request of the Project Manager after the need to purchase equipment has been identified. Generally, an application to purchase equipment is not filed to meet the needs of the research group of leaders employed at an IRAP unit before the implementation of the IRAP project is started, unless they have been selected in a competition conducted with the participation of the International Science Committee (ISC).

2.1.3. Based on the rules specified in the present document, it is possible to purchase equipment necessary for the significant development of the aforementioned project and/or the development of the R&D human resources engaged in the project, provided that the IRAP unit does not have equipment that could be used as an alternative, and gaining access to such equipment in another unit is impossible or unjustified from an economic point of view.

2.1.4. The equipment which is the subject of the application submitted under the present procedure is not covered by the budget percentage restriction adopted for the purchase of low-cost research equipment specified under “Other direct costs” in the Cost Eligibility Guide for Measure 4.3 of the Smart Growth Operational Programme (SG OP), which in each instance constitutes an appendix to the competition documentation in the IRAP programme.

2.1.5. Within the framework of the competition, the funding obtained only concerns the IRAP Project carried out under the grant agreement in force on the date the application is filed.

2.2. Applicant

2.2.1. As per this procedure the applicant is the IRAP Project Manager together with the IRAP unit at which the project is being carried out.

2.3. Deadlines for submitting applications

2.3.1. The competition for funding equipment will be conducted on a continuous basis, from October 2, 2017 until the funds allocated for this purpose are exhausted. Applicants may not submit applications for funding equipment prior to the completion of the competition procedure, and only following the selection of the first research group leader and the signing of the grant agreement, and no later than 18 months before the deadline for the completion of the IRAP project, as specified in the grant agreement.

2.3.2. The IRAP Project Manager may submit several applications as part of the competition.
2.4. **Total requested amount**

2.4.1. The requested amount of funding understood as the purchase price of the equipment should not exceed **PLN 3,500,000**. In justified cases, the Foundation may accept a funding application for an amount exceeding the suggested amount.

2.4.2. The amount of funding is the direct cost of the project, and the value of that funding increases the value of the IRAP project, along with an appropriately calculated flat-rate.

2.4.3. The amount of funding granted for the purchase of equipment constitutes the basis for calculating costs to be accounted for using the simplified method (Flat rate costs). The amount of funding granted for the purchase of equipment is excluded from the calculation base for the remaining categories limited in accordance with the *Cost Eligibility Guide for Measure 4.3. of the Smart Growth Operational Programme (SG OP)*.

2.5. **Manner of submitting applications**

2.5.1. Applicants must register with the electronic system made available by the Foundation on the website **https://wnioski.fnp.org.pl**. The electronic form must be filled in **in English** and the attachments must be in the format and language specified below.

2.5.2. Applicants fill in an electronic form, completing it with, among other things, the basic information concerning the applicant and the budget necessary to finance the purchase of the equipment, and enclose the obligatory documents (see 2.5.3. a-d) along with the *Project Manager’s Statement*, the template for which is available for download from the Foundation website. The electronic system enables the electronic form of the application to be modified and attachments to be replaced as long as application data edition has not been closed.

At the next stage, applicants upload to the electronic system a *Statement of the research unit* at which the project is carried out. The statement form is to be downloaded from the Foundation’s website, and then completed, printed out, signed in accordance with the representation rules applicable at the unit, scanned and uploaded to the electronic system. The *Statement of the research unit* cannot be uploaded before **completion of editing of the application data**.

**NOTE:**

Submission of the application using electronic system is only possible after the editing of the application data has been completed and the required *Statement of the research unit* at which the project is carried out has been enclosed.

---

2 The purchase price may also include expenses relating to the *transportation, installation and start-up* of the purchased equipment together with *specialist instructions on its operation*, expenses related to *checking and testing* the research equipment purchased as part of the project and the so-called *technical assistance* to be ensured by the manufacturer during the first operation period of the purchased equipment, etc. As a condition, the aforementioned expenses must be included in the initial value of the equipment purchased or specified in the agreement for the supply of goods with the supplier.
2.5.3. The following four attachments in PDF format are to be enclosed with the electronic application form:

a) **a list of equipment which is the subject of the application for funding**, including the anticipated purchase price, the specifications of the equipment and the planned timetable for the purchase, including the dates of the tendering procedure and the dates of the execution of the agreement with the supplier for the supply of goods, and of the execution of the delivery-acceptance record (max. three A4 pages for a single piece of equipment, the attachment is to be in English),

b) **substantive information on the progress of the research conducted** as part of the project along with the reasons for which the proposed equipment needs to be purchased and a description of any changes to the project relating to the planned purchase of the equipment (max. six A4 pages, the attachment is to be in English),

c) **an analysis of the availability** of the specialist equipment which is the subject of the competition in Poland and a **list of large research infrastructure** in the unit’s possession, for the purchase of which the IRAP unit has obtained funding under the Innovative Economy Operational Programme (POIG) or the Infrastructure and Environment Operational Programme (POIŚ) and which has been purchased to be used for the same purpose and in relation to the same themes as those of the research conducted under the IRAP project (max. three A4 pages, the attachment is to be in Polish),

**NOTE:**
The contact details of the person preparing the list, i.e. the email address and telephone number, should be provided in the document.

d) **the new values of the project indicators along with a justification** (the attachment is to be in English in accordance with the template available for download from the Foundation’s website).

The attachments constitute an integral part of the application

---

**III. Application evaluation system**

The applications submitted will be evaluated on their formal and merit-based aspects. Decisions to grant funding will be taken in continuous mode, and the Foundation will make every effort to ensure that correctly submitted applications are evaluated within three months of being submitted.

**3.1. Formal evaluation**

3.1.1. Applicants whose applications do not meet the formal criteria will be informed (by email or via the electronic system) that their applications have been rejected for formal reasons.

3.1.2. If the submitted attachments are prepared on the basis of other templates or exceed the number of pages specified in the present document, such attachments will need to be corrected by the applicant within 14 days of information to this effect being provided.
3.1.3. Where an electronic file uploaded to the electronic system is found to be defective or if editing errors are identified, the Programme Officer may request, at any stage of the evaluation, that such issues be solved within 14 days of information to this effect.

3.1.4. Should the documents specified in items 3.1.2 and 3.1.3 not be submitted, applications which do not meet the formal criteria will not be further processed on formal grounds.

3.2. **Merit-based evaluation**

Applications which meet the formal requirements will be referred for substantive evaluation to be conducted by a Panel of Experts.

3.2.1. The Panel of Experts includes at least three members who have considerable experience in research or innovation implementation in the R&D sector and one member of the Board of the Foundation (who will chair the meeting without the right of evaluation). The Foundation may appoint separate panels, relevant to particular disciplines represented by the applications submitted.

3.2.2. The IRAP Project Manager is to be invited for an interview with the Panel of Experts evaluating the application together with at least one and no more than two persons who can provide relevant and exhaustive information concerning the equipment available at the unit, e.g. the leader of the research group to which the application refers or the research unit representative responsible for managing the research equipment at the unit.

3.2.3. At the request of the Panel of Experts, the Foundation may refer the application for external review and for re-evaluation by the Panel.

3.2.4. The meetings of the Panel of Experts are held at the offices of the Foundation or at another location specified by the Foundation. In exceptional cases, interviews by phone or with the use of online tools (such as Skype) may be held. Each such case will be examined individually.

3.2.5. A representative of the Intermediary Authority of the Smart Growth Operational Programme (the National Centre for Research and Development) will be invited to attend the meeting of the evaluation panel as an observer.

3.2.6. Experts are to compare the submitted applications and evaluate them taking into account:

- the compliance of the application with the IRAP project accepted for funding in terms of substance,
- the legitimacy of the proposed expenses related to the equipment.

3.2.7. The Board of the Foundation for Polish Science makes a decision to grant funding for the purchase of equipment on the basis of the recommendation of the Expert Panel, save that the purchase of specialist equipment may not be approved for a project carried out with the participation of a research unit which has received substantial funding for large research infrastructure (pursuant to Article 2 of Act of 30 April 2010 on the Rules for Financing Science) as part of the Innovative Economy Operational Programme or the Infrastructure and Environment Operational Programme within the same scope of research as that carried out under the IRAP project. The Foundation for Polish Science will consult the Intermediary Authority for Axis 4 of the SG OP programme regarding applications for the purchase of specialist equipment by such units, in particular to confirm whether substantial funding has been obtained and to identify any overlaps between the themes addressed in
the International Research Agendas project and the purposes for which equipment was purchased under the POIG or POIŚ programmes.

3.2.8. Written information on funding being granted or on a refusal to grant it will be sent (via electronic mail) to all applicants.

3.3. **Appeals procedure**

3.3.1. The appeals procedure in place at the Foundation does not constitute an appeals procedure within the meaning of the Act of 29 August 2014 on the Principles of Implementation of the Cohesion Policy Programmes Financed under the 2014-2020 Financial Perspective.

3.3.2. The applicant may appeal in writing to the Board of the Foundation against non-compliance with the procedures at any stage of application evaluation, within 7 days of the receipt of an official notification. The appeal will be examined within 21 days of its receipt by the Foundation.

3.3.3. The date of receipt by the Foundation, rather than the stamp date, will be binding, with the provision that an appeal may also be lodged with the Foundation by e-mail, at the address odwołania@fnp.org.pl.

3.3.4. The Appeals Committee exclusively reviews procedural matters relevant to each of the stages of application evaluation and selection.

3.3.5. The final opinion is adopted by a vote. Upon examination of the Committee’s opinion, the Board of the Foundation decides whether the application should be re-evaluated (by the Expert Panel or a reviewer) or dismissed. The appellant will be informed in writing of the decision. The decision of the Board is final.

**IV. Funding of the purchase of specialist equipment**

4.1. Funds allocated for the purchase of equipment as part of the present competition are granted on the basis of an annex to a grant agreement under the IRAP programme, which will specify the rules for disbursing, accounting for and, where necessary, returning funds, and the reporting rules concerning expenditure of funds.

4.2. The starting and completion dates of the purchase of equipment are to be specified by the applicant bearing in mind that the purchase of equipment must be completed **no later than 6 months** before the completion date of the IRAP project specified in the grant agreement.

4.3. Completion of the purchase of equipment includes:
   a) delivery of the equipment to the unit,
   b) provision of a copy of proof of payment,
   c) registration of the aforementioned equipment as a fixed asset of the unit (in accordance with the unit’s accounting policy),
   d) provision of copies of the acceptance / installation / start-up records with the annotation “accepted without reservations”.

4.4. The unit is obliged to provide the Foundation with a copy of the signed agreement for the supply of specialist equipment concluded with the supplier, certified as a true copy of the original, on the date specified in the grant agreement.
4.5. The unit is obliged to submit a written statement confirming completion of the purchase, in accordance with the template provided by the Foundation, within the time limit specified in the grant agreement.

4.6. Before signing an annex to the grant agreement, the Foundation reserves the right to enter into negotiations with each of the entities seeking to be granted funds for the purchase of equipment.

4.7. A template for an annex to the grant agreement constitutes Appendix 1 to this procedure.

4.8. If, as a result of the correctly conducted proceedings for the purchase of equipment, the final purchase amount proves higher than the amount requested, the applicant may request the Foundation in writing to change the granted amount. Such a request will be examined individually, using the in absentia mode, on the basis of the enclosed statement of reasons, and if it is accepted, the relevant annex to the agreement will be concluded.

4.9. The purchase of equipment must be made respecting the rules of fair competition and equal treatment of tenderers in tendering procedures in compliance with the Public Procurement Law Act, if applicable, or the principle of competitiveness, as defined in the Guidelines on Eligibility of Expenditures under the European Regional Development Fund, the European Social Fund, and the Cohesion Fund for the years 2014-2020 and in the Cost Eligibility Guide for Measure 4.3 for the Smart Growth Operational Programme for the units other than state aid beneficiaries. When incurring eligible expenditures, the principles of effectiveness, openness and transparency apply and the obligation to use best endeavours to avoid any conflict of interest understood as lack of impartiality and objectivity.

4.10. The purchase of used equipment may be funded if all of the following requirements are met:
    a) the seller of the equipment has issued a declaration specifying the origin of the equipment,
    b) the seller of the equipment has confirmed in the declaration that the given item has not been funded using EU aid funds or as part of co-financing from national public funds over the previous 7 years,
    c) the purchase price of the used equipment does not exceed its market value and is lower than the cost of similar new equipment.
