

- D A. Kudelski, A. Michota, J. Bukowska  
 Monolayers of sulfur-containing molecules at metal surfaces as studied using SERS: 3,3'-thiodipropionic acid and 3-mercaptopropionic acid adsorbed on silver and copper.  
*J. Raman Spectrosc*, **36** (2005) 709-714.
- 2) A. Kudelski  
 Raman studies of rhodamine 6G and crystal violet sub-monolayers on electrochemically roughened silver substrates: Do dye molecules adsorb preferentially on highly SERS-active sites?  
*Chem. Phys. Lett.*, **414** (2005) 271-275.
- 3) A. Kudelski  
 Characterization of thiolate-based mono- and bilayers by vibrational spectroscopy: A review.  
*Vib. Spectrosc*, **39** (2005) 200-213.
- 4) B. Wrzosek, J. Bukowska, A. Kudelski  
 Place-exchange reactions of thiols on electrochemically roughened SERS-active silver.  
*Vib. Spectrosc*, **39** (2005) 257-261.
- 5) B. Wrzosek, J. Bukowska, A. Kudelski  
 Raman study on the structure of adlayers formed on silver from mixtures of 2-aminoethanethiol and 3-mercaptopropionic acid.  
*J. Raman Spectrosc*, **36** (2005) 1040-1046.
- 6) W. Kozmihski, I. Zhukov, M. Pecul, J. Sadlej  
 A proton backbone angle dependence of  $J$ ; the new NMR experiment and quantum chemical calculations.  
*J. Biomol. NMR*, **31** (2005) 87-95.
- 7) J.P. Devlin, M.W. Severson, F. Mohamed, J. Sadlej, V. Buch, M. Parinello  
 Experimental and computational study of isotopic effects within the Zundel ion.  
*Chem. Phys. Lett.*, **498** (2005) 439-444.
- 8) J. Sadlej, J.Cz. Dobrowolski, J.E. Rode, M.H. Jamroz,  
 DFT study of vibrational circular dichroism spectra of D-lactic acid-water complexes.  
*Phys. Chem. Chem. Phys.*, **8** (2005) 101-113.
- 9) M. Pecul  
 Density functional and coupled cluster calculations of dynamic hyperpolarizabilities and their geometry derivatives.  
*Chem. Phys. Lett.*, **404** (2005) 217-226.
- 10) H. Czubulski, M. Pecul, T. Helgaker, M. Jaszunski  
 Theoretical studies of nuclear magnetic resonance parameters for the proton-exchange pathways porphyrin and porphycene,  
*J. Phys. Chem. A*, **109** (2005) 4162-4171.
- 11) M. Pecul, D. Marchesan, K. Ruud, S. Coriani  
 Polarizable continuum model study of solvent effects on electronic circular dichroism parameters.  
*J. Chem. Phys.*, **122** (2005) 024106.
- 12) W. Dzwoiak, M. Pecul  
 Chiral Bias of Amyloid Fibrils Revealed by the Twisted Conformation of Thioflavin T: an Induced Circular Dichroism Study.  
*FEBS Letters.*, **579** (2005) 6601-6603.

- 13) A. Kudelski  
Raman studies on the coverage integrity of monolayers formed on silver from various functionalised alkanethiols.  
*Vib. Spectrosc.*, **41** (2006) 83-89.
- 14) A. Kudelski  
Role of O<sub>2</sub> in inducing intensive fluctuations of surface-enhanced Raman scattering spectra.  
*J. Phys. Chem. B*, **110** (2006) 12610-12615.
- 15) A. Kudelski  
Fluctuations of Raman spectra of hydrogenated amorphous carbon deposited on electrochemically-roughened silver.  
*Chem. Phys. Lett.*, **427** (2006) 206-209.
- 16) N. Uras-Aytemiz, J.P. Devlin, J. Sadlej, V. Buch  
HCl Solvation in methanol clusters and nanoparticles: evidence for proton-wires.  
*Chem. Phys. Lett.*, **422** (2006) 179-183.
- 17) N. Uras-Aytemiz, J.P. Devlin, J. Sadlej, V. Buch  
HCl solvation at the surface and within methanol clusters/nanoparticles II. Evidence for molecular wires.  
*J. Phys. Chem. B*, **110** (2006) 21751-21763.
- 18) A. Antusek, M. Pecul, J. Sadlej  
Relativistic calculation of NMR properties of XeF<sub>2</sub>, XeF<sub>4</sub>, XeF<sub>6</sub>.  
*Chem. Phys. Lett.*, **427** (2006) 281-288
