Łukasz Jakubski

Lista Publikacji

1. Jakubski, Ł., Grzybek, P., Chrobak, A., Haye, E., Colomer, J.-F., Konieczny, K., Turczyn, R., Dudek, G. (2021). Single-molecule magnets as novel fillers with superior dispersibility – First application of a tetranuclear iron(III) molecular magnet [Fe4(acac)6(Br-mp)2] for pervaporative dehydration of ethanol. Separation and Purification Technology, 277, 119038. https://doi.org/10.1016/j.seppur.2021.119038

2. Jakubski, Ł., Chrobak, A., Gołombek, K., Matus, K., Krzywiecki, M., Turczyn, R., & Dudek, G. (2023). Synergistic effect of tetranuclear iron (III) molecular magnet and magnetite towards high-performance ethanol dehydration through an alginate membrane. Separation and Purification Technology, 320. https://doi.org/10.1016/j.seppur.2023.124222

3. Jakubski, Ł., Jakubska, J., Chrobak, A., Gołombek, K., & Dudek, G. (2025). Beneficent impact of mixed molecular magnet/neodymium powder for facilitating ethanol dehydration in the pervaporation process. Separation and Purification Technology, 352, 128160. https://doi.org/10.1016/j.seppur.2024.128160

4. Jakubski, Ł., Jendrzejewska, I., Chrobak, A., Gołombek, K., & Dudek, G. (2025). Advanced magnetic membranes with chromite fillers: role of structure and magnetism in ethanol pervaporation. Separation and Purification Technology, 378, Article Pt. 3. https://doi.org/10.1016/j.seppur.2025.134796

5. Dudek, G., Jakubski, Ł., & Turczyn, R. (2022). Patent No. 240645. Materiał membranowy magnetyczno-organiczny do odwadniania etanolu, sposób otrzymywania i zastosowanie. Retrieved from https://ewyszukiwarka.pue.uprp.gov.pl/search/pwp-details/P.434018
